#### **General Assembly**

**12/2020 12/2020** 

- TIC TAC GO: A monolithic application written in vanilla Javascript to hone problem solving skills. The solution has been deployed to Github pages: https://adenrashid.github.io/tic-tac-go/
- · Tech used: Javascript, HTML, CSS.
- WOOFR: Twitter for dogs. A RESTful API crud app where users can sign
  up, upload photos, create posts, update their profile and comment on
  other posts. All data is saved in a database and can be re-accessed
  once logged out. Adhered to the MVC pattern to ensure separation of
  concerns. Deployed on Heroku: https://woofr-project2sei39.herokuapp.com/
- Tech used: Ruby, BCrypt, Sinatra, SQL, PostgreSQL, Cloudinary, HTML, CSS
- TECH TRACKER: Co-developed a web scraper API to scan and compare tech prices between two websites JB Hi Fi and Harvey Norman. The site lets you search for a keyword or choose from popular tech searches, and returns products. You can then click on a product to compare prices from both retailers. Deployed on Heroku.
- Tech used: Javascript, Node.js, PostgreSQL, Puppeteer, Axios, Express, HTML, CSS.
- REPORT IT: A React application built using the google maps api. Users
  can report incidents near their area through searching for one's
  location (autocomplete) or through user current location. The app
  includes functionality to pin an incident on the map, update incident
  description, and find a specific address using reverse geolocation.
  Filters are implemented which allow users to sort incidents by time
  reported (ascending or descending), or by location. Deployed on Surge:
  https://report-it-app.surge.sh/
- Tech used: React, Javascript, HTML, CSS, react router dom, Google Maps API, Places API.

### adenrashid.com

#### **Portfolio Website**

- Built using Javascript, HTML, CSS
- An old version of the site is live but I am currently updating this

#### **Dentist**

#### **Various Private Practice Clinics**

**1** 01/2018 - 08/2020

- Working within multidisciplinary teams, training new staff
- High level of attention to detail and time management skills, especially whilst working in a fast paced, high stress environment
- Adaptability when faced with challenging scenarios

# **OTHER INTERESTS**

Video games

Houseplants

## **EDUCATION**

## Software Engineering Immersive

### **General Assembly**

## 09/2020 - Ongoing

- Intensive program learning fundamental coding practices and software design patterns
- Developing good quality software and object orientated programming
- · Creating full stack applications
- Safely modelling and storing data in SQL databases
- · Use of third party API's
- Gaining exposure to developing solutions in an agile setting
- Designed and developed four different web applications with a variety of technologies
- Pair programming
- · Working remotely
- All applications are version controlled using Git

## Web Development

### Codecademy

**∰** 2020

 100% completion in Javascript, React, HTML, CSS

# Bachelor of Dental Surgery The University of Adelaide

**2013 - 2017** 

# First Aid & CPR Certificate Australian First Aid

**10/2019 - 10/2022**
